

SRAVAN TEJA GUDIMELLA

FACULTY / TECHNICAL TRAINER / DEVELOPER

[+91 XXXXXXXXXX] | [sravan1482000@gmail.com] | [Guntur - India] | [LinkedIn - [sravanteja_gudimella](#)]

PROFESSIONAL PROFILE

Technology-focused faculty/trainer with experience in developing structured technical learning content and hands-on programming coursework. Experienced in Core Java and JVM fundamentals, Python and FastAPI development, PostgreSQL, Git/Bitbucket workflows, and project-oriented technical learning. Strong focus on practical instruction through modules, code examples, exercises, documentation, and guided projects.

FACULTY & TEACHING STRENGTHS

- Curriculum and module development for technical courses.
- Core Java and JVM fundamentals, including Java setup, Eclipse IDE, programming concepts, and execution workflow.
- Hands-on programming instruction using practical examples and project-based exercises.
- Backend development fundamentals using Python, FastAPI, PostgreSQL, and API testing.
- Version control and collaborative development workflows using Git and Bitbucket.
- Preparation of teaching presentations, technical documentation, code examples, exercises, and course repositories.
- Explaining development workflows from setup through implementation, testing, version control, and maintenance.

TECHNICAL SKILLS

Programming	Java, Python
Java	Core Java, JVM fundamentals, Eclipse IDE; Java 8+ / modern Java curriculum
Backend	FastAPI, REST API development, Pydantic
Database	PostgreSQL, pgAdmin, psycopg
Version Control	Git, Bitbucket, repositories, branches, commits
Development Tools	Postman, VS Code, Eclipse IDE
Course Development	Technical presentations, Markdown documentation, code examples, exercises, structured modules
Emerging Areas	Python for AI/ML, AI/ML, LLM / Generative AI fundamentals

TEACHING / COURSE DEVELOPMENT EXPERIENCE

APEX Course Project — Technical Course Development & Training Materials

- Developed initial Core Java teaching modules covering Java history, Java/JDK and Eclipse installation, project creation, and running Java programs.
- Structured additional curriculum covering data types, variables, operators, control statements, arrays, OOP, collections, streams, and related modern Java topics.
- Created raw, content-focused presentation material and supporting documentation for classroom delivery.
- Organized course materials, code, exercises, and documentation for collaborative storage and version control in Bitbucket.
- Designed practical execution workflows for Java development and Eclipse-based project creation and execution.

SELECTED TECHNICAL PROJECTS / PRACTICAL WORK

FastAPI REST API: Posts-oriented API using FastAPI and Pydantic, including GET/POST endpoints, validation, HTTP exceptions, response handling, and database integration concepts.

FastAPI + PostgreSQL: Worked with PostgreSQL/pgAdmin and psycopg for database connectivity and API-to-database workflows.

Git & Bitbucket Workflows: Repository organization, remotes, authentication/tokens, permissions, branches, commits, and course-oriented repository structure.

Machine Learning Project Work: Academic ML project design, classification-oriented problem formulation, and selection/definition of realistic datasets and features.

TEACHING AREAS

Core Java & JVM Fundamentals • Modern Java • Python • Backend Development • FastAPI & REST APIs • PostgreSQL • Git & Bitbucket • AI/ML Foundations • LLM / Generative AI Fundamentals

EDUCATION & QUALIFICATIONS

MTech - CSE	Vignan University	Pursuing (2026 – 2028)
MCA	Bapatla Engineering College	2022 - 2024
BSc - MECS	SVRM - College	2019 - 2022

ADDITIONAL INFORMATION

- Teaching approach: practical, structured, concept-first learning supported by code examples and exercises.
- Professional focus: faculty / technical trainer opportunities in Computer Science, IT, programming, backend development, and related technical subjects.
- References available upon request.
