Subject: Submission of Preferred Software Career Domain

Respected Sir/Madam,

I am Rahul Kumar, a student of «Course», currently studying in 3rd Year. As part of the career guidance and domain selection activity, I am writing to formally submit my preferred area of interest for pursuing a career in the software industry.

After considering my interests and current skills, I would like to select the following domain as my primary career preference:

Preferred Domain: Backend Development

My secondary area of interest is:

Secondary Domain: DevOps

My current skill level in the selected area is Beginner, and the technology that I am particularly interested in learning or working with is Python.

I understand that the software industry provides several career opportunities, including Frontend Development, Backend Development, Full-Stack Development, DevOps, Cloud Computing, Data Science, Data Engineering, Cybersecurity, Mobile Application Development, Software Testing, and other emerging areas.

I would like to develop my knowledge and practical skills in my selected domain through appropriate coursework, hands-on projects, technical training, and industry-oriented activities. I kindly request your guidance and support in planning a suitable learning path for my selected career domain.

I hereby submit my preference for your consideration and further guidance.

Thank you.

Yours faithfully,

Rahul Kumar
